

EZ 2000 Integrated Intra Oral Camera

When it comes to selling and communicating cases to patients a picture says it all.

Intraoral cameras are proven tools for boosting patient awareness and case acceptance.

The intra-oral camera is a simple to use, high quality solution to improve case communication.

Our Intra Oral Camera makes chair side intraoral imaging affordable enough to include a camera in every operatory, making case presentation and treatment proposals that much easier... and more effective!

PLUS IT INTEGRATES WITH your EZ 2000 Digital Dental System to create a seamless patient record.
